Fluted polypropylene plastic sheets are an extruded product comprised of two skins separated by vertical ribs. The square box shape of the flutes makes the sheets rigid and strong. Sheets are very lightweight, especially compared to solid sheets. Fluted polypropylene is available in a variety of thicknesses and sizes to fit most applications. Cost effective product. Sheets are moisture, temperature, abrasion, acid and impact resistant.

Corona Treatment 2 sides
Colors + 10%
All sheets sold in clear PE Packs,
Freight paid on full truck load
Less than truck Load
FOB Lakeland, Fl
20 pallets per truckload

Pollycor corrugated PP board is very ideal for various applications, such as advertising sign and display, beverage layer pad, construction floor and wall protection, electronics handling and storage, agriculture, logistics, stationary and other industries.

It is available in different colors, thicknesses, sizes, functions; for instance, ESD / Conductive (12 years + expert), Flame retardant, UV stabilized and so on.
