Extruded Acrylic Sheet

Our extruded Acrylic sheets are manufactured by a continuous production process where our PMMA is fed from a containment silo to a feed hopper above an extruder line, then to an extrusion barrel. This process is done with the upmost care and specifications. The result is an Impact resistant sheet that weighs half the amount of glass, making it an exciting alternative. There are thousands of uses and benefits of extruded acrylic, only some are listed below.

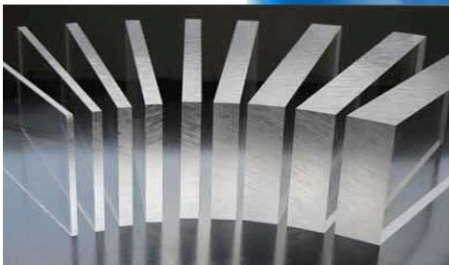

Benefits

- **Printable**
- **Weather resistant**
- **Light weight compared to glass**
- **Can be formed to different shapes**
- **Can be glued, nailed and sawed.**
- **Comes in colors or clear**
- **Widely used in the signage industry.**

Sheet Specifications

Thickness	Length
0.8mm – 12mm (0.03” – 0.47”)	48” x 96” 48” x 120” 60” x 96” 60” x 120”
Colors	Clear and colors.
Patterns	Standard smooth finish Textures
Masking	Film and Paper

Custom sizes and special orders available, please call for more information.
